West Virginia Board of Risk and Insurance Management
Charleston, West Virginia

Report on the Financial Statements

We have audited the accompanying financial statements of the West Virginia Board of Risk and Insurance Management (BRIM), an enterprise fund of the State of West Virginia, as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the BRIM's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of BRIM, an enterprise fund of the State of West Virginia, as of June 30, 2016, and the changes in the financial position and cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Basis of Presentation

As discussed in Note 2, the financial statements of BRIM are intended to present the financial position, and the changes in financial position and cash flows of only that portion of the business type activities of the State of West Virginia that is attributable to the transactions of BRIM. They do not purport to, and do not present fairly the financial position of the State of West Virginia as of June 30, 2016, and the changes in its financial position and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Prior Period Financial Statements

The financial statements of BRIM as of and for the year ended June 30, 2015, were audited by other auditors whose report dated December 7, 2015, expressed an unmodified opinion on those statements.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis on pages 4 to 11 and the required supplementary information on pages 58 to 63 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Financial Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise BRIM's basic financial statements. The accompanying schedules on pages 64 through 71 listed in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we also have issued our report dated December 19, 2016, on our consideration of BRIM's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering BRIM's internal control over financial reporting and compliance.

Management's Discussion and Analysis (in thousands)

Overview of the financial statements

Management of the West Virginia Board of Risk and Insurance Management (BRIM) provides this Management's Discussion and Analysis for readers of BRIM's financial statements. This narrative overview of the financial activities of BRIM is for the years ended June 30, 2016, 2015, and 2014. BRIM provides property and casualty insurance to the State of West Virginia (the State) agencies and Senate Bill 3 (SB3) entities, which include boards of education, and governmental and nonprofit organizations. BRIM also administers a coal mine subsidence reinsurance program that makes available to the general public dwelling insurance covering damage caused by the collapse of underground coal mines. From December 2001 until novation to a physician's mutual on July 1, 2004, BRIM's program was expanded to include providing medical malpractice insurance to private sector health care providers (referred to hereafter as the House Bill 601 Program). The hospitals that were non-renewed in 2003 are still being managed by BRIM for claims that were made during the period they were insured.

As an enterprise fund, BRIM's financial statements are reported using the economic resources measurement focus and the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America for governmental entities. The three basic financial statements presented are as follows:

- *Statement of Net Position* - This statement presents information reflecting BRIM's assets, liabilities, and net position and is categorized into current and noncurrent assets and liabilities. For purposes of the financial statements, current assets and liabilities are those assets and liabilities with immediate liquidity or that are collectible or becoming due within 12 months of the statement's date.

The statement of net position reports a separate financial statement element called *deferred outflows of resources*. This financial statement element represents a consumption of net position that applies to a future period and so will *not* be recognized as an outflow of resources (expense) until that time. The statement of net position reports a separate financial statement element called *deferred inflows of resources*. This financial statement element represents an acquisition of net position that applies to a future period and so will *not* be recognized as an inflow of resources (revenue) until that time.

- *Statement of Revenues, Expenses, and Changes in Net Position* - This statement reflects the operating and nonoperating revenues and expenses for the operating year. Operating revenues primarily consist of premium income with major sources of operating expenses being claims loss and loss adjustment expense and general and administrative expenses. Nonoperating revenues primarily consist of investment income and appropriations from the State.
- *Statement of Cash Flows* - The statement of cash flows is presented on the direct method of reporting, which reflects cash flows from operating, noncapital financing, and investing activities. Cash collections and payments are reflected on this statement to arrive at the net increase or decrease in cash and cash equivalents for the year.

During fiscal year 2016, BRIM implemented Governmental Accounting Standards Board (GASB) Statement No. 72, *Fair Value Measurement and Application* and GASB Statement No 79, *Certain External Investment Pools and Pool Participants*. GASB 72 generally requires investments to be measured at fair value and disclosures to be made about fair value measurements, the level of fair value hierarchy, and valuation techniques, organized by type of asset or liability reported at fair value. It also requires additional disclosures for investments in certain entities that calculate net asset value (NAV) per share (or its equivalent). GASB 79 establishes criteria for making the election to measure all of its investments at amortized cost for financial reporting purposes. BRIM participates in BTI's West

**West Virginia Board of Risk and Insurance Management
Management's Discussion and Analysis
(in thousands)**

Virginia Money Market Pool, which has been deemed to meet the criteria and is reported at amortized cost. Accordingly, as a pool participant BRIM measures its investment in this pool at amortized cost. The adoption of the these standards had no effect on BRIM's statements of net position or changes in net position, but primarily related to modifications and additions to the disclosures related to BRIM's cash equivalents and investments.

Effective July 1, 2014, BRIM adopted the provisions of GASB Statement No. 68, Accounting and Financial Reporting for Pensions — an amendment of GASB Statement No. 27, and GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date — an amendment of GASB Statement No. 68. BRIM determined that it was not practical to restate all periods presented and has recorded the cumulative effect of the decrease to beginning net position of implementing this change of \$495 as of July 1, 2014, which is the net pension liability of \$628 less deferred outflows of resources related to pension plan contributions of \$133 as of that date. BRIM further determined that it was not practical to determine the amounts of all deferred inflows of resources and deferred outflows of resources related to pensions as of July 1, 2014, and these amounts are not reported.

**West Virginia Board of Risk and Insurance Management
Management's Discussion and Analysis
(in thousands)**

- Total assets increased by \$6,215 in 2016 and decreased by \$7,038 in 2015. The increase in 2016 is due to an increase in investment earnings and an increase in premium revenue. The decrease in 2015 is due to increased premiums and lower investment earnings. This was offset by an increase in claims paid to claimants in 2015.
- Total liabilities increased \$8,302 in 2016 and increased by \$8,910 in 2015. Estimated claims expense increased in 2016 and 2015, mostly from an increase in the current year provision for both years and adverse development in the prior year reserve estimates for 2015, including an unanticipated increase in State general liability claims (primarily in 2010 and 2011 reserves) and a couple of large property loss occurrences that adversely impacted both the State and SB3 programs (2012 reserves).
- Several factors contributed to the \$1,861 decrease in total net position for 2016 and the \$16,091 decrease for 2015. In 2016, revenue increased due to premium increases and investment earnings increased over 2015 by, \$2,580, due to market conditions. BRIM also implemented GASB 68 in 2015, which resulted in an adjustment that reduced beginning net position by \$495. Total operating expenses for the year decreased \$4,028, which was primarily caused by the decrease in claims expense. In 2016, the increase in estimated claims expense liability grew by a combined \$7,475 based on the actuarial study. The investment returns of 2016 almost offset the increase in claims liability. Also included within the net position category are restricted positions totaling \$57,123 in 2016, \$55,428 in 2015, and \$53,595 in 2014 for programs that provide mine subsidence coverage to the general public per the West Virginia State Code and that had previously provided medical malpractice tail coverage for the House Bill 601 Program.
- Total net operating revenues increased by \$6,377 in 2016 and increased by \$5,981 in 2015. The unfavorable claims trend developments in prior years' outstanding claims reserve has led BRIM to increase premium rates to policyholders for 2016 and 2015.
- Total operating expenses decreased to \$67,658 in 2016 from \$71,686 in 2015. Claims and claims adjustment expense decreased year over year by \$4,392 while G&A expenses increased by \$364.
- Nonoperating revenues, net increased by \$3,330 in 2016 and decreased \$10,960 in 2015. The increased investment returns reflect the increase of the market value of the bonds held resulting from the lower interest rate environment, while a weaker stock market impacted the other investment holdings.
- Total revenues and total expenses from 2016 to 2015 and from 2015 to 2014 have fluctuated due to alterations in premium rates, the changes in the retained loss estimates, and the variations in annual investment market returns. See the analysis of these individual components, as previously discussed, for additional information.

Overall analysis

The overall condition of BRIM deteriorated 1.0% from the prior year compared with a decrease of 7.7% from 2014 to 2015. Reserves increased again in 2016, but there was also an increase in investment earnings over 2015. The overall increase in claims and claims adjustment expense, offset in part by an increase in investment earnings, caused the decrease of net position for the current year, reflecting a net position total of \$190,959 at June 30, 2016. BRIM continues to adhere to a comprehensive financial stability and rating plan.

Unpaid Claims Liability

BRIM's most significant number on its statements of net position is the liability for estimated unpaid claims and claims adjustment expense. This liability consists of two parts: claims of which BRIM is aware that have been

**West Virginia Board of Risk and Insurance Management
Management’s Discussion and Analysis
(in thousands)**

reserved and incurred but not reported (IBNR) claims, which are projected by an independent actuary. From fiscal year 2015 to 2016, the liability for unpaid claims increased from \$160,960 to \$168,435. The chart below shows the estimated unpaid claims and claims adjustment expense liability for fiscal years 2007 through 2016.

House Bills 601 and 2122

In December 2001, the West Virginia Legislature passed House Bill 601, which authorized BRIM to provide medical malpractice and general liability coverage to health care providers. This bill was created as a result of the medical malpractice insurance crisis created by private sector insurance companies' nonrenewing insurance policies for health care providers on a national level and in the State.

During the legislative session in early 2003, House Bill 2122 was enacted. This bill allowed for the physicians insured under House Bill 601 to novate into a physicians' mutual. On July 1, 2004, these physicians were novated to the West Virginia Physicians' Mutual Insurance Company (WVPMIC). The hospitals and clinics that did not novate were not renewed by BRIM prior to June 30, 2004. Tail coverage was offered to all terminated insurers in House Bill 601. In March 2015, BRIM novated any potential future claims on the tail policies to a commercial carrier. BRIM paid the carrier \$750 to assume the liability of these claims. Legislation passed in March 2016 closed the Medical Liability Fund and all remaining funds were transferred to the West Virginia Patient Liability Fund in July 2016.

Results by Line of Business for BRIM

BRIM's lines of business are comprised of the State (state agencies), SB3 (for nonprofits, boards of education, and other governmental units), mine subsidence (for home and business owners), and House Bill 601 (medical malpractice for private physicians).

The following chart shows the breakdown by customer and line of business of the total estimated claim liability number, which is \$168,435. As demonstrated in the chart, the largest claim volume for BRIM relates to general liability for the State agencies and SB3 programs and the State agencies' medical malpractice coverage.

**West Virginia Board of Risk and Insurance Management
Management's Discussion and Analysis
(in thousands)**

There is no long-term debt activity.

Economic factors and next year's rates

Management's Plan to Maintain Net Position by Line of Business

BRIM has had no deficiency in net position for the programs it has overseen for several years. Previously, however, a deficiency arose, primarily due to adverse claim development in the general liability and medical malpractice lines of business for the State and SB3. The following paragraphs describe the essential plans that BRIM continues to follow to ensure that all lines of business remain fiscally solvent and that the individual programs are financially sound.

Risk Management

BRIM continues pursuing an aggressive risk management plan to help identify the risks underlying the adverse losses that occurred in earlier years. Processes are in place to allow for better organization and for proper documentation of activities. BRIM has been working on ways to increase and improve communications, both within the agency and with its customers, and has been promoting interaction within the agency with regard to loss control utilization. In conjunction with the underwriting department, a system of credits and surcharges is in place, based on loss control efforts and cooperation, or lack thereof, on the part of BRIM's insurers.

Investment Returns

Investment income increased for fiscal year 2016 and decreased for 2015. The market conditions in 2016 were more favorable than 2015, and investment income was somewhat higher. The increase in 2016 was due to a slightly more favorable interest rate environment. All BRIM funds held by the West Virginia Investment Management Board (WVIMB) inure to the benefit of program participants. BRIM reinvests the investment earnings on funds held by the WVIMB and occasionally withdraws monies from these funds, as needed, for operating and short-term cash requirements. In 2016 and 2015, BRIM withdrew \$5 million and \$12 million, respectively, of its funds from the WVIMB for operational purposes.

**West Virginia Board of Risk and Insurance Management
Management's Discussion and Analysis
(in thousands)**

Premium Determination Process

BRIM has properly maintained premiums across all lines of business for the past several years based on relevant exposure data, claims loss history, and investment returns. Charging proper premiums, consistent with the commercial industry, has enabled BRIM to adequately cover losses. Although fiscal year 2016 benefited from prior years' reserve releases, both 2015 and 2014 saw overall net increases in retained claims reserves. If this recent claim trend persists over the next several fiscal years and future investment returns continue to decline, it may require premium increases to allow for a sufficient level of funding to adequately sustain the operation of all programs and to help ensure that no premium deficiency develops.

In addition, BRIM adopted a net assets reserve policy in 2014. The policy calculates a ratio of premiums to net position for comparison to other similar agencies. A range was established to assist BRIM's board in assessing its overall financial condition.

Requests for information

This financial report is designed to provide BRIM's customers, governing officials, legislators, citizens, and taxpayers with a general overview of BRIM's accountability for the money it receives. If you have any questions about this report or need additional information, contact the Office of the Chief Financial Officer at (304) 766-2646.

Notes to Financial Statements **(in thousands)**

1. General (Amounts referenced in this note related to insurance coverages are actual dollars)

The West Virginia Board of Risk and Insurance Management (BRIM) was established in 1957 to provide for the development of the State of West Virginia's (the State and primary government) property and liability self-insurance program. Approximately 161 State agencies participate in the program. Beginning in 1980, county boards of education were authorized to participate in the liability portion of this program, with 55 county boards currently participating in the program. In fiscal year 1987, Senate Bill 3 (SB3) was enacted, allowing local governmental entities and nonprofit organizations to participate in the entire program. There are approximately 900 such entities participating in the program. In 1982, legislation was also enacted requiring BRIM to establish and administer a coal mine subsidence reinsurance program that makes available to the general public dwelling insurance covering damage up to a specific maximum caused by the collapse of underground coal mines.

BRIM operates under the authority granted by the Legislature in Chapter 29, Article 12, and Chapter 33, Article 30, of the West Virginia Code and the provisions of Executive Order 12-86. BRIM is an agency of the State operating within the Department of Administration and is governed by a five-person board of directors appointed by the Governor. Accordingly, BRIM is reported as an enterprise fund of the State, operating as a single business segment, and is included in the State's Comprehensive Annual Financial Report.

BRIM uses a "modified" paid retrospective rating plan for its liability insurance program. Under the current plan, BRIM annually pays a "premium" deposit into a trust fund in the amount of the estimated losses for the current policy year. As claims are reported, they are paid from the trust funds established by the "premium" deposit. When paid losses exceed the amount of the "premium" deposit, including earnings, BRIM pays into the trust account an additional "premium" deposit estimated to be sufficient to fund any estimated remaining claims and claims adjustment expenses expected to be paid during the ensuing 12-month period. These payments are calculated through retrospective rating adjustments made subsequent to the current policy year. Therefore, the "premiums" paid by BRIM are advance deposits, and BRIM is not indemnified by the insurance company for any losses. Under this plan, the insurance company is compensated for its claim-handling services by a fixed fee negotiated on a yearly basis.

From January 1, 1971 through June 30, 1976, the liability coverage provided by BRIM was limited to \$25 thousand per occurrence on general liability, automobile liability, and medical malpractice claims. From July 1, 1976 through June 30, 1980, the liability coverage provided by BRIM was limited to \$100 thousand per occurrence. From July 1, 1982 through June 30, 1985, the liability coverage provided by BRIM was limited to \$6 million per occurrence. Since July 1, 1985, the liability coverage provided by BRIM is limited to a \$1 million indemnity per occurrence. In addition, the county boards of education are covered by an excess insurance policy providing up to \$5 million of coverage in excess of the underlying \$1 million limit. These limits only apply to incur indemnity claim losses. BRIM pays all allocated loss adjustment expenses, which are the costs incurred in the reporting, investigation, adjustment, defense, and settlement of claims that are attributable to a specific, individual claim.

Prior to July 1, 1990, BRIM retained the first \$25 thousand of loss per event on property insurance claims. Losses in excess of \$25 thousand per event were also retained within an annual aggregate limit. From July 1, 1990 through June 30, 1991; the exposure retained by BRIM was \$1 million per event. From July 1, 1991 through June 30, 1996, the exposure retained by BRIM was \$2 million per event. Since July 1, 1996, the exposure retained by BRIM is \$1 million per event. BRIM has obtained excess coverage, through insurance companies, covering losses in excess of \$1 million, up to \$400 million per occurrence, subject to various sublimits for particular types of claims as specified

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

in the policy. With the passage of House Bill 532 in March 2015, BRIM is required to retain the first \$1.5 million of medical malpractice liability for the state's medical schools and their related practice plans beginning July 1, 2015. The retained limit of \$1.5 million is indexed for inflation each year. On July 1, 2016, the retained limit increased slightly.

In 1985, the coal mine subsidence program was legislatively expanded to include all types of building structures, and the maximum amount of insurance available was increased from \$50 thousand to \$75 thousand per structure. Additional legislation passed in March 2016 further expanded the amount of insurance available beginning October 1, 2016, from \$75,000 up to \$200,000 per structure.

In December 2001, the West Virginia Legislature passed House Bill 601, which authorized BRIM to provide medical malpractice and general liability coverage to private health care providers (the House Bill 601 Program). On July 1, 2004, all physicians novated to the newly formed West Virginia Physicians' Mutual Insurance Company (WVPMIC). BRIM maintained the hospital and facilities in the House Bill 601 Program that did not novate to WVPMIC. However, all policies were terminated as of June 30, 2004, and the program was in runoff mode only for existing claims and for any claims that may be submitted on any tail policies that were purchased. In 2015, BRIM transferred potential claims/IBNR run-off to a third-party for \$750. In July 2016, the remaining balance of the House Bill 601 funds of \$2.8 million were transferred to the Patient Injury Compensation Fund, which is discussed in the following paragraph.

In March 2004, the West Virginia Legislature passed House Bill 4740, creating a Patient Injury Compensation Fund. The purpose of this fund is to provide fair and reasonable compensation to claimants in medical malpractice actions for any portion of economic damages awarded that is uncollectible as a result of previously enacted tort reforms. This fund provides relief to claimants whose damages were limited because of caps for trauma care or as a result of joint and several liabilities. The capitalization of the fund comes from the State's tobacco settlement fund. The activity for this fund is not reflected in BRIM's financial statements. BRIM serves as third-party administrator for this fund and, accordingly, the activity for this fund is reflected in the State's financial statements. Legislation passed in March 2016 transferred all funds in the Medical Liability Fund to the West Virginia Patient Injury Fund, effective July 1, 2016, resulting in the closing of the Medical Liability Fund. This legislation also closed compensation to any claimants who filed with the Patient Injury Fund on or after July 1, 2016. Additional funding to pay any compensable claims filed as of June 30, 2016 was established by creation of assessments imposed on medical liability claims awards and settlements and fees charged to licensed physicians and hospitals.

In the normal course of business, BRIM seeks to reduce the loss that may arise from catastrophes or other events that cause unfavorable operating results by reinsuring levels of risk in various areas of exposure with other insurance enterprises or reinsurers. Reinsurance permits recovery of a portion of losses from reinsurers; however, it does not discharge the primary liability of BRIM as direct insurer of the risks insured. BRIM does not report reinsured risks as liabilities unless it is probable that those risks will not be covered by reinsurers.

The funding of the property and liability insurance premiums for the State agencies comes from direct premium assessments on those agencies. SB3 entities are charged a premium to participate in the program. Under the mine subsidence line of business, the ceding insurers pay BRIM a reinsurance premium.

Pursuant to the West Virginia Code, BRIM submits a detailed budgetary schedule of administrative expenses to the secretary of the Department of Administration prior to the beginning of each fiscal year. The fundamental purpose of budgetary control is to plan for the expected level of operations and to provide management with a tool to control deviation from such plan. The budgetary schedule is prepared on a modified cash basis, which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles (GAAP). Expenditures related to the general revenue appropriation amount, if any, are monitored by the State's budgetary review process in total on an unclassified basis. Each year's appropriation lapses at year-end. The remaining operations of BRIM are subject to a nonappropriated budgetary review process.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

GAAP defines component units as legally separate organizations for which the elected officials of the primary government are financially accountable or other organizations for which the nature and significance of their relationship with the State's financial statements would cause them to be misleading. BRIM has considered whether it has any component units as defined by GAAP and has determined that no such organizations meet the criteria set forth above.

2. Summary of Significant Accounting Policies

Basis of accounting

As an enterprise fund, BRIM's financial statements are reported using the economic resources measurement focus and the accrual basis of accounting in conformity with GAAP. Revenues are recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. In its accounting and financial reporting, BRIM follows the pronouncements of the Governmental Accounting Standards Board.

BRIM distinguishes operating revenues and expenses from nonoperating revenues and expenses. Operating revenues and expenses generally result from providing services in connection with BRIM's principal ongoing operations. The principal operating revenues and expenses of BRIM relate to premium revenues and claims and administrative expenses. Premium contributions received covering future contract periods are deferred and recognized over the related contract period. Net investment earnings and finance charges are reported as nonoperating revenues.

The financial statements of BRIM are intended to present the financial position and the changes in financial position and cash flows of only that portion of the business-type activities of the State of West Virginia that is attributable to the transactions of BRIM. They do not purport to, and do not, present fairly the financial position of the State of West Virginia as of June 30, 2016 and 2015, and the changes in its financial position and its cash flows for the years then ended in conformity with GAAP.

Adoption of new Accounting Standards

During fiscal year 2016, BRIM implemented GASB Statement No. 72, *Fair Value Measurement and Application* and GASB Statement No 79, *Certain External Investment Pools and Pool Participants*. GASB 72 generally requires investments to be measured at fair value and disclosures to be made about fair value measurements, the level of fair value hierarchy, and valuation techniques, organized by type of asset or liability reported at fair value. It also requires additional disclosures for investments in certain entities that calculate NAV per share (or its equivalent). GASB 79 establishes criteria for making the election to measure all of its investments at amortized cost for financial reporting purposes. The adoption of these standards had no effect on BRIM's statements of net position or changes in net position, but primarily related to modifications to the disclosures related to BRIM's cash equivalents and investment disclosures in Note 3.

During fiscal year 2016, BRIM also implemented GASB Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*, which identifies, in the context of the current government financial reporting environment, the hierarchy of generally accepted accounting principles (GAAP). This statement supersedes GASB Statement No. 55. The GAAP hierarchy consists of the sources of accounting principles used to prepare financial statements of state and local governmental entities in conformity with GAAP and the framework for selecting those principles. This Statement reduces the GAAP hierarchy to two categories of authoritative GAAP and addresses the use of authoritative and nonauthoritative literature in the event that the accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP. The sources of authoritative GAAP are categorized as follows: Category A – officially established accounting principles (GASB Statements) and Category B – GASB Technical Bulletins, GASB Implementation Guides, and literature of the AICPA cleared by the GASB. The adoption of this standard had no effect on BRIM's statements of net position or changes in net position.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from management's estimates.

Cash and cash equivalents

Cash equivalents are short-term investments with original maturities of 90 days or less. Cash and cash equivalents principally consist of interest-earning deposits in an investment pool maintained by the West Virginia Board of Treasury Investments (BTI). Such funds are available to BRIM with overnight notice.

Restricted cash and cash equivalents are cash and cash equivalents that are to be used for specific lines of business (i.e., mine subsidence coverage provided to the general public, and medical malpractice and general liability coverage provided to health care providers) based on restrictions provided in the State Code.

Advance deposits with insurance company and trustee

Advance deposits with the insurance company consist of monies on deposit that are utilized to fund claims and claims adjustment expenses as they are paid by the insurance company.

BRIM deposits monies with the Bank of New York (BNY), as trustee, to hold as advance deposits in an escrow account for BRIM liability claims. The monies held in escrow are invested in specific money market funds and short-term guaranteed or investment-grade fixed-income securities that are identified as "qualified assets" in the escrow agreement. The funds held in escrow, together with their earnings, will be used to fund the payment of the claims and claims adjustment expenses related to these liability claims. As an escrow agent, BNY periodically transfers monies from the escrow account to the insurance company administering these claims in order to reimburse the insurance company for payments that it has issued on these claims and claims adjustment expenses on BRIM's behalf.

Investments

BRIM invests in certain West Virginia Investment Management Board (WVIMB) investment pools. Some of these pools invest in longer-term securities and are subject to market fluctuation because of changes in interest rates. Investments are reported by WVIMB at fair value and are accounted for by BRIM accordingly, with changes in the fair value included in investment income. Income from these investments is prorated to BRIM at rates specified by WVIMB based on the balance of BRIM's deposits maintained in relation to the total deposits of all State agencies participating in the pool.

Restricted investments are investments that are to be used for specific lines of business (i.e., mine subsidence coverage provided to the general public and medical malpractice and general liability coverage provided to health care providers) based on restrictions provided in the State Code.

Fair value measurements

BRIM measures certain investments at fair value for financial reporting purposes. GASB Statement No. 72 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is a market-based measurement, not an entity-specific measurement. BRIM categorizes fair value measurements within the fair value hierarchy established by accounting principles generally accepted in the United States of America in accordance with GASB Statement No. 72.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

The fair value hierarchy established under GASB Statement No. 72 categorizes the inputs to valuation techniques used to measure fair value into three levels as follows:

Level 1 inputs – Quoted prices (unadjusted) for identical assets or liabilities in active markets that a government can access at the measurement date.

Level 2 inputs – Inputs – other than quoted prices included within Level 1 – that are observable for an asset or liability, either directly or indirectly.

Level 3 inputs – Unobservable inputs for an asset or liability.

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgement, and considers factors specific to the investment.

Fair value of the securities BRIM holds with the IMB are determined as follows:

- Equity securities are valued at the last sale price or official closing price reported in the market in which they are primarily traded.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Future contracts are valued at the last settlement price established each day by the exchange on which they traded.
- Fixed income securities are valued according to prices furnished by independent pricing services to the securities custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriated to the specific security type.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Compensated absences

Employees fully vest in all earned but unused annual leave, and BRIM accrues for obligations that may arise in connection with compensated absences for vacation at the current rate of employee pay. In accordance with State personnel policies, employees vest in any remaining unused sick leave only upon retirement, at which time any unused compensated absence time can be converted into employer-paid premiums for postemployment health care coverage through the West Virginia Board of Risk and Insurance Management (BRIM) or be converted into a greater retirement benefit under the State of West Virginia Public Employees Retirement System (PERS).

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Unpaid claims and claims adjustment expense

Utilizing an external actuary, management establishes the unpaid claims and claims adjustment expense liability based on estimates of the ultimate cost of claims, including future claims adjustment expenses, that have been reported but not settled and of claims that have been incurred but not reported (IBNR). Such estimates are based on industry statistical loss reserve information as well as BRIM historical data, including case-basis estimates of losses reported, actuarial projections of loss development of IBNR claims, and estimates of expenses for investigation and adjustment of all incurred and unadjusted losses (and estimates of expected salvage and subrogation receipts are deducted from the estimated liability). The length of time for which such costs must be estimated varies depending on the coverage involved. In the event a reinsurer is unable financially to satisfy an obligation, BRIM is responsible for such liability.

Management believes the estimate for unpaid claims and claims adjustment expense is a reasonable best estimate of BRIM's ultimate losses and loss adjustment expenses to be incurred to discharge BRIM's obligations. However, because actual claims costs depend on such complex factors as actual outcomes versus industry statistical information utilized in the estimation process, inflation, changes in doctrines of legal liability, and damage awards, the process used in computing estimates of claims liability does not necessarily result in an exact amount, particularly for coverages such as general liability and medical malpractice. For instance, medical malpractice claims have a long payout period and claims may not be known for several years. Accordingly, BRIM's actual incurred losses and loss adjustment expenses may vary significantly from the estimated amounts reflected in BRIM's financial statements. Claims liabilities are recomputed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claim frequency, and other economic and social factors; such adjustments are included in current operations. A provision for inflation in the calculation of estimated future claims costs is implicit in the calculation because reliance is placed both on actual historical data that reflects past inflation and on other factors that are considered to be appropriate modifiers of past experience. The claims and claims adjustment expense category on the statements of revenues, expenses, and changes in net position includes estimated incurred claim costs, allocated loss adjustment expenses, and unallocated claims adjustment expenses.

Premium deficiency is defined as the amount by which expected claims costs (including IBNR claims) and all expected claims adjustment expenses exceed related unearned premiums. BRIM has estimated that a premium deficiency does not exist, however, the ultimate amount of incurred losses and loss adjustment expenses may vary significantly from the estimated amounts used in management's determination. In making this determination, management has taken into consideration anticipated investment income, using an assumed 4% discount rate.

Deferred outflows of resources

A deferred outflow of resources is a consumption of net position by the government that is applicable to a future reporting period. Balances of deferred outflows of resources may be presented in the Statements of Net Position as aggregations of different types of deferred amounts. Deferred outflows in the Statements of Net Position were composed of \$387 and \$127 for the years ending June 30, 2016 and 2015, respectively, related to employer contributions to the Public Employees Retirement System (PERS) made during the current fiscal year subsequent to the measurement date. Deferred outflows also consisted of other amounts related to differences between projected and actual earnings on pension plan investments and differences between expected and actual experience related to pension.

Deferred inflows of resources

A deferred inflow of resources is an acquisition of net position by the government that is applicable to a future reporting period. Balances of deferred inflows of resources may be presented in the Statements of Plan Net Position as aggregations of different types of deferred amounts. Deferred inflows in the Statements of Plan Net Position are composed of amounts related to differences between projected and actual earnings on pension investments, changes in proportion and differences between BRIM's contributions and proportionate share of contributions, differences in assumptions and differences between projected and actual earnings on pension plan investments related to pension.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Receivables and premium income

Receivables represent the amount outstanding for premiums from the insured covered under BRIM's insurance program. Management maintains an allowance for doubtful accounts to reserve for estimated losses based on the length of time the amount has been past due.

Unearned premiums

Unearned premiums included premium revenues collected for future periods. These revenues will be recognized in the operating periods in which they are earned.

Restricted net position

Restricted net position is net position that is to be used for the House Bill 601 Program and mine subsidence coverage provided to the general public based on restrictions provided in the State Code. When an expense is incurred for which both restricted and unrestricted net positions are available, BRIM first utilizes restricted net position for such purpose.

Reclassification

Certain liability amounts for 2015 have been reclassified to conform to the 2016 presentation. Such reclassifications had no impact on previously reported net position or changes in net position.

Subsequent events

In preparing these financial statements, BRIM has evaluated events and transactions for potential recognition or disclosure through December 19, 2016, the date the financial statements were available for issuance.

3. Deposit and Investment Risk Disclosures

BRIM is mandated by statute to have its cash and investments managed by the WVIMB and BTI. However, BRIM currently does not have specific policies addressing limitations on specific risk types, such as credit risk, custodial credit risk, concentration of credit risk, interest rate risk, or foreign currency risk.

Cash equivalents

West Virginia Money Market Pool

BRIM participates in BTI's West Virginia Money Market Pool, which has been deemed to meet the GASB 79 criteria to be reported at amortized cost. The criteria specify that the pool must transact with their participants at a stable net asset value per share and meet requirements for portfolio maturity, portfolio quality, portfolio diversification, portfolio liquidity, and shadow pricing. The BTI does not place limitations on or restrictions on participant withdrawals from the pool, such as redemption notice periods, maximum transaction amounts, and any authority to impose liquidity fees or redemption gates. Accordingly, as a pool participant the BRIM measures its investment in this pool at amortized cost that approximates market value of \$25,002 and \$16,147 at June 30, 2016 and June 30, 2015, respectively. These deposits are reported as cash and cash equivalents. Investment income earned is pro-rated to BRIM at rates specified by the BTI based on the balance of the deposits maintained in relation to the total deposits of all state agencies participating in the pool. Such funds are available to BRIM with overnight notice. BTI's audited financial statements, including the West Virginia Money Market Pool, are available on their website www.wvbt.com.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. The WV Money Market Pool has been rated AAAM by Standard & Poor's. A fund rated "AAAM" has extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit, market, and/or liquidity risks. "AAAM" is the highest principal stability fund rating assigned by Standard & Poor's.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

The BTI limits the exposure to credit risk in the West Virginia Money Market Pool by requiring all corporate bonds to be rated AA- by Standard and Poor's (or its equivalent) or higher. Commercial paper must be rated at least A-1 by Standard and Poor's and P-1 by Moody's. The pool must have at least 15% of its assets in U.S. Treasury obligations guaranteed as to repayment of interest and principal by the United States of America.

The following table provides information on the weighted-average credit ratings of the West Virginia Money Market Pool's investments:

<u>Security Type</u>	<u>Credit Rating</u>		<u>2016</u>		<u>2015</u>	
	<u>Moody's</u>	<u>S&P</u>	<u>Carrying Value</u>	<u>Percent</u>	<u>Carrying Value</u>	<u>Percent</u>

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the WV Money Market Pool's investment in a single corporate issuer. West Virginia statutes prohibit the West Virginia Money Market Pool from investing more than 5% of its assets in securities issued by a single private corporation or association. At June 30, 2016 and 2015, the pool did not have investments in any one private corporation or association that represented more than 5% of assets.

Custodial Credit Risk

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the WV Money Market Pool will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. Repurchase agreements are required to be collateralized by at least 102% of their value, and the collateral is held in the name of the BTI. The BTI or its agent does not release cash or securities until the counterparty delivers its side of the transaction.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. All pools and accounts are subject to interest rate risk.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

The overall weighted-average maturity (WAM) of the investments of the West Virginia Money Market Pool cannot exceed 60 days. Maximum maturity of individual securities cannot exceed 397 days from date of purchase, except for government floating rate notes, which can be up to 762 days. The following table provides the WAM for the various asset types in the West Virginia Money Market Pool:

<u>Investment Type</u>	<u>June 30, 2016</u>		<u>June 30, 2015</u>	
	<u>Fair Value</u>	<u>WAM Days</u>	<u>Fair Value</u>	<u>WAM Days</u>
Repurchase agreements	\$ 42,100	1	\$ 12,523	1
U.S. Treasury notes	231,398	88	229,760	75
U.S. Treasury bills	19,982	91	92,059	123

Certificates of deposit	208,007	40	203,005	51
U.S. agency discount notes	-	-	304,342	60
Corporate bonds and notes	49,282	14	30,000	75
U.S. agency bonds/notes	9,499	24	81,994	58
Money market funds	72,370	1	90,017	1
Total rated investments	<u>\$ 1,555,529</u>	49	<u>\$ 1,890,464</u>	47

BRIM's amount invested in the West Virginia Money Market Pool of \$25,002 is included in cash and cash equivalents at June 30, 2016, and \$16,147 at June 30, 2015, representing approximately 1% of total investments in this pool.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or deposit. The WV Money Market's Pool does not hold securities subject to foreign currency risk.

Investments

West Virginia Investment Management Board Investment Pools

BRIM invests, along with other agencies, in the following WVIMB investment pools: Domestic Large Cap Equity Pool, Domestic Non-Large Cap Equity Pool, International Equity Pool, International Nonqualified Equity Pool, Short-Term Fixed Income Pool, Total Return Fixed Income Pool, Core Fixed Income Pool, Hedge Fund, and the Treasury Inflation Protection Securities (TIPS).

Investment Objectives

This fund's investment objective is to achieve a total rate of return of at least 4.9% per annum, net of fees.

Asset Allocation

Based upon the WVIMB's determination of the appropriate risk tolerance for the fund, the WVIMB has adopted the following broad asset allocation guidelines for the assets managed for the Board of Risk and Insurance Management Fund. (Policy targets have been established on a market value basis.)

<u>Asset Class</u>	<u>Policy Target</u>
Domestic equity	15%
International equity	15
Fixed income	70
Combined total	<u>100%</u>

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Asset Value

Investments at cost, and as reported at fair value (actual asset allocation), are summarized as follows at June 30:

	2016		2015	
	Cost	Fair Value	Cost	Fair Value
Large cap domestic	\$ 15,198	\$ 15,710	\$ 15,532	\$ 16,733
Non-large cap domestic	4,064	3,716	3,757	3,963
Opportunistic debt	1,543	1,555		
International equity	16,308	15,055	15,646	14,540
International nonqualified	5,317	4,892	5,303	5,317
Total return fixed income	29,494	29,182	35,090	34,012
Core fixed income	12,976	13,308	14,725	14,631
Hedge fund	30,102	28,793	26,201	27,815
TIPS (Treasury Inflation Protection Securities)	12,675	13,368	13,788	13,686
Short-term fixed income	6,641	6,641	6,981	6,981
Total investments	<u>\$ 134,318</u>	<u>\$ 132,220</u>	<u>\$ 137,023</u>	<u>\$ 137,678</u>

Investment income is comprised of the following for the years ended June 30:

	2016	2015
Investment income:		
Interest income including realized gains/losses on sale of securities	\$ 1,550	\$ 1,658
Unrealized gain on investments	<u>5,863</u>	<u>3,175</u>
Total investment income	<u>\$ 7,413</u>	<u>\$ 4,833</u>

WVIMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. Realized gains and losses on investments that had been held in more than one fiscal year and sold in the current year were included as unrealized gain on investment in the prior year.

Asset class risk disclosures

Large Cap Domestic Equity Pool

The Pool's objective is to exceed, net of external investment management fees, the S&P 500 Stock Index over three-to-five-year periods. Assets are managed by INTECH Investment Management, LLC (INTECH) and State Street Global Advisors (SSgA). BRIM's amount invested in the Large Cap Domestic Equity Pool of \$15,710 and \$16,733 at June 30, 2016 and 2015, respectively, represents approximately 0.5% and 0.5%, respectively, of total investments in this pool.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Credit Risk

The Pool is exposed to credit risk from certain investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one company. At June 30, 2016 and 2015, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016 and 2015, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the WVIMB. All remaining securities are held by the WVIMB's custodian in the name of the WVIMB.

Interest Rate Risk

The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned. The weighted average maturity for investments made with cash collateral for securities loaned is not to exceed 90 days. The following table provides the WAM for applicable investments made with cash collateral for securities loaned as of June 30, 2016 and 2015:

<u>Investment Type</u>	<u>2016</u>		<u>2015</u>	
	<u>Fair Value</u>	<u>WAM (Days)</u>	<u>Fair Value</u>	<u>WAM (Days)</u>

Non-Large Cap Domestic Equity Pool

The Pool invests in the equities of small to mid-sized companies and its objective is to exceed, net of external investment management fees, the Russell 2500 Index over three-to-five-year periods. Assets are managed by AJO and Westfield Capital Management (Westfield). BRIM's amount invested in the non-large cap domestic pool of \$3,716 and \$3,963 at June 30, 2016 and 2015, respectively, represents approximately 0.5% and 0.5%, respectively, of total investments in this pool.

Credit Risk

The Pool is exposed to credit risk from certain investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase.

The following table provides information on the weighted average credit ratings of the Pool's investments as of June 30:

International Equity Pool

This Pool invests in the equities of international companies. Assets are managed by Acadian Asset Management, LLC (Acadian), Axiom International Investors, LLC (Axiom), Brandes Investment Partners, L.P. (Brandes), LSV Asset Management (LSV), and Oberweis Asset Management, Inc. (Oberweis). The objective of the Pool is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US Index over three-to-five-year periods. BRIM's amount invested in the International Equity Pool of \$15,055 and \$14,540 at June 30, 2016 and 2015, respectively, represents approximately 0.5% and 0.6%, respectively, of total investments in this pool.

Credit Risk

The Pool is exposed to credit risk from certain investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase.

Short-Term Fixed Income Pool

The main objective of this Pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. JP Morgan Investment Advisors, Inc. (JPM) manages the Pool. The Pool's investment objective, net of external investment fees, is to meet or exceed the Citigroup ninety-day T-bill Index plus fifteen basis points. BRIM's amount invested in the Short-Term Fixed Income Pool of \$6,641 and \$6,981 at June 30, 2016 and 2015, respectively, represented approximately 2.5% and 2.6%, respectively, of total investments in this Pool.

Credit Risk

The WVIMB limits the exposure to credit risk in the Pool by requiring all corporate bonds to be rated AA or higher. Commercial paper must be rated A-1 by Standard & Poor's and P-1 by Moody's. Additionally, the Pool must have at least 15% of its assets in United States Treasury issues.

The following tables provide information on the weighted average credit ratings of the Short-Term Fixed Income Pool's investments as of June 30:

<u>Investment Type</u>	<u>June 30, 2016</u>			<u>Percent of Total Investment</u>
	<u>Moody's</u>	<u>S&P</u>	<u>Carrying Value</u>	
Commercial paper	P-1	A-1	\$ 52,734	14.9 %
Money market mutual fund	Aaa	AAA	82,161	23.2
U.S. Government agency issues	P-1	A-1	130,482	37.0
U.S. Treasury issues	Aaa	AA	<u>88,046</u>	<u>24.9</u>
Total rated investments			<u>\$ 353,423</u>	<u>100.0 %</u>

This table includes U.S. Treasury notes received as collateral for repurchase agreements with a fair value of \$13,260 as compared to the amortized cost of the repurchase agreements of \$13,000.

<u>Investment Type</u>	<u>June 30, 2015</u>			<u>Percent of Total Investment</u>
	<u>Moody's</u>	<u>S&P</u>	<u>Carrying Value</u>	
Commercial paper	Aaa	AA	\$ 22,999	8.5 %
U.S. Government agency issues	Aaa	AA	136,763	50.5
U.S. Treasury issues	Aaa	AA	<u>110,922</u>	<u>41.0</u>
Total rated investments			<u>\$ 270,684</u>	<u>100.0 %</u>

This table includes U.S. Treasury notes received as collateral for repurchase agreements with a fair value of \$65,365 as compared to the amortized cost of the repurchase agreements of \$64,341.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no investments that were subject to custodial credit risk. Repurchase agreements are collateralized at 102 percent and the collateral is held in the name of the WVIMB. All remaining investments are held by the WVIMB's custodian in the name of the WVIMB.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Interest Rate Risk

The weighted-average maturity of the investments of the Short-Term Fixed Income Pool is not to exceed 60 days. The maturity of floating rate notes is assumed to be the next interest rate reset date. The following table provides the WAM for the various asset types in the Short-Term Fixed Income Pool as of June 30, 2016 and 2015:

<u>Investment Type</u>	<u>2016</u>		<u>2015</u>	
	<u>Fair Value</u>	<u>WAM (Days)</u>	<u>Fair Value</u>	<u>WAM (Days)</u>
Commercial paper	\$ 52,734	22	\$ 22,999	19
Money market mutual fund	82,161	N/A	-	-
Repurchase agreement	13,000	1	64,341	1

U.S. Government agency issues	-	136,763	-	136,763
U.S. Treasury bonds	-	45,557	-	45,557
Total	<u>\$ -</u>	<u>\$ 269,660</u>	<u>\$ -</u>	<u>\$ 269,660</u>

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2015.

International Nonqualified Equity Pool

This Pool invests in The Silchester International Investors International Value Equity Trust (Silchester). The Pool's objective is to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East Index by 200 basis points on an annualized basis over three-to-five-year periods, net of external investment management fees. The Pool exists for participants who are not "qualified" (as defined by the *Internal Revenue Code*). The Pool invests in a collective trust fund that invests in equities denominated in foreign

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

currencies. The value of this pool at June 30, 2016 and 2015 was \$141,311 and \$153,554, respectively. This Pool, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments. The Pool is not exposed to credit risk, interest rate risk, custodial credit risk, or concentration of credit risk.

BRIM's amount invested in the International Nonqualified Pool of \$4,892 and \$5,317 at June 30, 2016 and 2015, respectively, represents approximately 3.5% and 3.5%, respectively, of total investments in this pool.

Fair Value Measurements

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The investment in Silchester is valued using the net asset value per share practical expedient. As Silchester is the only investment in the Pool, a fair value hierarchy table is not presented.

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016 and 2015, respectively.

Redemption Provisions

The Pool is restricted to the following redemption provisions: monthly on the first business day.

Total Return Fixed Income Pool

This Pool's objective is to earn superior returns with low volatility by actively investing in the extended fixed income markets. Dodge & Cox (DAC), Franklin Templeton Investments (FTI), and Western Asset Management Company (Western) manage the Pool. The Pool's investment objective, net of external investment management fees, is to meet or exceed the Barclay Capital Universal Index. BRIM's amount invested in the Total Return Fixed Income Pool of \$29,250 and \$34,012, at June 30, 2016 and 2015, respectively, represented approximately 1.4% and 1.2%, respectively, of total investments in the Pool.

Credit Risk

The WVIMB limits the exposure to credit risk in the Total Return Fixed Income Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations.

The following tables provide the weighted average credit ratings of the rated assets in the Pool as of June 30:

<u>Investment Type</u>	<u>June 30, 2016</u>			<u>Percent of Total Investment</u>

These unrated securities represent 16% of the fair value of the Pool's investments.

This table includes investments received as collateral for repurchase agreements with a fair value of \$15,783 as compared to the amortized cost of the repurchase agreements of \$14,948.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016 and 2015, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016 and 2015, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the WVIMB. Investments in commingled funds are held in an account in the name of the WVIMB. All remaining securities are held by the WVIMB's custodian in the name of the WVIMB.

Interest Rate Risk

The WVIMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. The following table provides the weighted-average effective duration for the various asset types in the Pool as of June 30, 2016 and 2015:

Investment Type	2016		2015	
	Fair Value	Effective Duration (Years)	Fair Value	Effective Duration (Years)
Bank loan	\$ 936	0.1	\$ -	-

Total investments	<u>\$ 2,149,802</u>	<u>5.1</u>	<u>\$ 2,378,551</u>	<u>4.5</u>

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The modified duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions, and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

are highly sensitive to interest rate changes. At June 30, 2016, the Pool held \$407,958 of these securities. This represents approximately 19.0% of the value of the Pool's securities.

Foreign Currency Risk

The Pool has foreign government bonds and foreign corporate bonds that are denominated in foreign currencies and are exposed to foreign currency risks. The Pool also has foreign denominated futures contracts, a currency swap, and foreign exchange forward contracts. Refer to Notes 7, 8, and 9, respectively, for details on these contracts. Additionally, the Pool has indirect exposure to foreign currency risk through its ownership interests in certain of the commingled investment pools. Approximately \$82,390, or 23 percent, of the commingled investment pools hold substantially all of their investments in foreign currencies. This represents approximately 4 percent of the value of the Pool's securities.

The tables below show amounts at fair value (in U.S. dollars) of investments and cash denominated in foreign currencies as of June 30:

<u>Currency</u>	June 30, 2016			Percent of Total Investments and Cash
	<u>Investments</u>	<u>Cash</u>	<u>Total</u>

This table excludes investments and cash held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated investments and cash is \$2,234,766. This represents approximately 93 percent of the value of the Pool's investments and cash.

Fair Value Measurements

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30. All the Pool's investments in other funds were valued using the net asset value per share practical expedient, as such they have not been categorized in the fair value hierarchy.

Redemption Provisions

The Pool is restricted to the following redemption provisions: daily.

Opportunistic Debt Pool

This Pool was established to hold the WVIMB's investments in middle market direct loans. Assets are managed by Angelo, Gordon & Co. and TCW Asset Management Company. The objective of the Pool is to generate a total net return of 7 - 9% over a normal market cycle (typically a 5 - 7 year period), and/or 250 basis points above the return of the credit Suisse Leveraged Loan Index. BRIM's amount invested in the Opportunistic Debt Pool of \$1,555 and \$0 at June 30, 2016 and 2015, respectively, represented approximately 1.4% and 0.0%, respectively, of total investments in the Pool.

Credit Risk

The Pool is exposed to credit risk from investments in unrated direct lending funds. This risk is limited by requiring that underlying fund holdings are at least 90 percent collateralized by one or more assets of the issuer. The Pool also holds shares of a money market fund with the highest credit rating.

Concentration of Credit Risk

Due to being in the infancy stage of the program, the fund is exposed to concentration of credit risk. Approximately 32 percent of committed capital has been called. As the program becomes fully funded, the concentration of credit risk will be mitigated. Each asset manager is restricted from investing more than 10 percent of the capital commitment in a single issuer for investments that are expected to be held longer than one year. At June 30, 2016, the Pool was in compliance with this restriction.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk.

Interest Rate Risk

The Pool is exposed to interest rate risk from investments in direct lending funds. The WVIMB manages interest rate risk of the Pool by requiring at least 80 percent of the fund holdings that mature in more than one year to have variable of floating interest rate structures.

Foreign Currency Risk

The investments in direct lending funds might be indirectly exposed to foreign currency risk.

Fair Value Measurements

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2016. All the Pool's investments in direct lending funds were valued using the net asset value per share practical expedient; as such, they have not been categorized in the fair value hierarchy.

Direct lending funds				<u>114,158</u>
Total				<u>\$ 114,258</u>

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

Redemption Provisions

The Pool is restricted to the following redemption provisions: upon termination of the partnership or limited liability company.

Core Fixed Income Pool

The main objective of this Pool is to generate investment income, provide stability and diversification, but not at the expense of the total return. JP Morgan Investment Advisors, Inc. (JPM) manages this Pool. This Pool's investment objective, net of external management fees, is to meet or exceed the Barclays Capital U.S. Aggregate Index. BRIM's amount invested in the Core Fixed Income Pool of \$13,342, and \$14,631 at June 30, 2016 and 2015, respectively, and represented approximately 1.3% and 1.4%, respectively, of total investments in this Pool.

Credit Risk

The WVIMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the nationally recognized statistical rating organizations.

The following table provides the weighted-average credit ratings of the rated assets in the Pool as of June 30:

<u>Investment Type</u>	June 30, 2016			<u>Percent of Total Investment</u>
	<u>Moody's</u>	<u>S&P</u>	<u>Fair Value</u>

Common stock			<u>7,134</u>	<u>0.7</u>
Total			<u>\$ 1,092,416</u>	<u>100.0 %</u>

This table includes investments received as collateral for repurchase agreements with a fair value of \$15,496 as compared to the amortized cost of the repurchase agreements of \$14,676.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the WVIMB. All remaining securities are held by the WVIMB's custodian in the name of the WVIMB.

Interest Rate Risk

The WVIMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the pool. The following table provides the weighted-average modified duration for the various asset types in Pool as of June 30, 2016 and 2015.

Total	<u>\$ 1,057,990</u>	<u>4.9</u>	<u>\$ 1,091,596</u>	<u>4.8</u>

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions, and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2016, the Pool held \$464,526 of these securities. This represents approximately 44.0% of the value of the Pool's securities.

Foreign Currency Risk

None of the securities held by the Pool are exposed to foreign currency risk.

Fair Value Measurements

Hedge Fund Pool

This Pool was established to hold the WVIMB's investments in hedge funds. Albourne America, LLC has been retained by the WVIMB to provide consulting services for this investment strategy.

This Pool holds shares in hedge funds and shares of a money market fund with the highest credit rating. The investments in hedge funds might be indirectly exposed to foreign currency risk, credit risk, interest rate risk, and/or custodial credit risk. The Pool is restricted from investing more than 10 percent of the value of the Pool with any single manager. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk. BRIM's amount invested in the Hedge Fund Pool of \$28,793 and \$27,815 at June 30, 2016 and 2015, respectively, represented approximately 1.8% and 1.7%, respectively, of total investments in this Pool.

Fair Value Measurements

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. All of the Pool's investments in hedge funds were valued using the net asset value per share practical expedient. As these are the only investments in the Pool, a fair value hierarchy table is not presented.

Redemption Provisions

The Pool is restricted to the following redemption provisions: ranging from monthly with 3 days prior written notice to every three years with 45 days prior written notice and subject to maximum withdrawal restrictions.

Treasury Inflation Protection Securities (TIPS)

The Pool invests in Treasury Inflation-Protected Securities (TIPS) and its objective is to match the performance of the Barclay's Capital U.S. TIPS Bond Index on an annualized basis over rolling three-year to five-year periods, gross of fees. Assets are managed by State Street Global Advisors (SSgA).

BRIM's amount invested in the TIPS Pool of \$13,368 and \$13,686 at June 30, 2016 and 2015, respectively, represented approximately 3.4% and 3.2% respectively, of total investments in this pool.

Credit Risk

The WVIMB limits the exposure to credit risk in the pool by primarily investing in U.S. Treasury inflation-protected securities (TIPS). The following tables provide the weighted-average credit ratings of the rated assets in the pool as of June 30:

<u>Investment Type</u>	<u>June 30, 2016</u>			<u>Percent of Assets</u>
	<u>Moody's</u>	<u>S&P</u>	<u>Fair Value</u>	
Money market mutual fund	Aaa	AAA	\$ 127	0.0 %
U.S. Treasury inflation-protected securities	Aaa	AA	<u>374,622</u>	<u>100.0</u>
Total rated investments			<u>\$ 374,749</u>	<u>100.0</u> %
<u>Investment Type</u>	<u>June 30, 2015</u>			<u>Percent of Assets</u>
	<u>Moody's</u>	<u>S&P</u>	<u>Fair Value</u>	
Short-term issue	Aaa	AAA	\$ 228	0.1 %
U.S. Treasury inflation-protected securities	Aaa	AA	<u>427,774</u>	<u>99.9</u>
Total rated investments			<u>\$ 428,002</u>	<u>100.0</u> %

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Concentration Of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. All securities are held by the WVIMB's custodian in the name of the WVIMB.

Interest Rate Risk

The WVIMB monitors interest rate risk of the pool by evaluating the real modified duration of the investments in the pool. The following table provides the weighted-average real modified duration for the various asset types in the pool as of June 30:

<u>Investment Type</u>	<u>June 30, 2016</u>		<u>June 30, 2015</u>	
	<u>Fair Value</u>	<u>Real Modified Duration (Years)</u>	<u>Fair Value</u>	<u>Real Modified Duration (Years)</u>
Money market mutual fund	\$ 127	N/A	\$ -	0.0
Short-term issue	-	-	228	0.0
U.S. Treasury inflation-protected securities	<u>374,622</u>	<u>7.9</u>	<u>427,774</u>	<u>7.9</u>
Total investments	<u>\$ 374,749</u>	<u>7.9</u>	<u>\$ 428,002</u>	<u>7.9</u>

The pool invests in TIPS, and its objective is to match the performance of the Barclay's Capital U.S. TIPS Bond Index on an annualized basis over rolling three-year to five-year periods, gross of fees. Assets are managed by State Street Global Advisors.

Foreign Currency Risk

None of the securities held by the Pool are exposed to foreign currency risk.

Fair Value Measurements

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The tables that follow sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2016 and 2015, respectively. All the Pool's investments in other funds were valued using the net asset value per share practical expedient; as such, they have not been categorized in the fair value hierarchy.

Advanced deposits

Insurance Company And Trustee

BRIM deposits monies with BNY, as trustee, to hold as advance deposits in an escrow account for BRIM liability claims. The monies held in escrow are invested in specific money market funds and short-term guaranteed or investment-grade fixed income securities that are identified as "qualified assets" in the escrow agreement.

The following table provides information on the weighted-average credit ratings of the cash liquidity pool's investments:

Concentration Of Credit Risk

As per the Investment Guidelines, at the time of purchase, no more than 4.9% of its advance deposit assets can be held in securities issued by a single private corporation or association.

Custodial Credit Risk

At June 30, 2016 and 2015, advanced deposits include no securities that were subject to custodial credit risk.

4. Unpaid Claims and Claims Adjustment Expense Liability

BRIM establishes an estimated liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related claims adjustment expenses. The following represents changes in the estimated liability for the fiscal and policy years ended June 30:

	<u>2016</u>	<u>2015</u>
Unpaid claims and claims adjustment expense liability at beginning of year	\$ 160,960	\$ 153,204
Incurred claims and claims adjustment expense:		
Provision for insured events of the current year	66,740	62,342
(Decrease) increase in provision for insured events of prior years	<u>(2,987)</u>	<u>5,803</u>
Total incurred claims and claims adjustment expense	63,753	68,145
Payments:		
Claims and claims adjustment expense attributable to insured events of the current year	(12,863)	(11,146)
Claims and claims adjustment expense attributable to insured events of prior years	<u>(43,415)</u>	<u>(49,243)</u>
Total payments	<u>(56,278)</u>	<u>(60,389)</u>
Total unpaid claims and claims adjustment expense liability at end of year	<u>\$ 168,435</u>	<u>\$ 160,960</u>

If the unpaid claims and claims adjustment expense liability were discounted using a 4% discount factor for 2016 and 2015 to take into consideration the time value of money, the result would be a decrease in the liability and an increase in net position of approximately \$14,876 and \$14,209 for fiscal years 2016 and 2015, respectively. The overall unpaid claim liability number includes a provision for allocated and unallocated claims adjustment expense.

5. Employee Benefit Plans

Plan description

All full-time BRIM employees are eligible to participate in the State's Public Employees' Retirement System (PERS), a multiple-employer defined benefit cost-sharing public employee retirement system administered by the West Virginia Consolidated Public Retirement Board (CPRB). Chapter 5, Article 10 of the West Virginia Code assigns the authority to establish and amend benefit provisions to the PERS Board of Trustees. Benefits under PERS include deferred retirement, early retirement, death and disability benefits and have been established and may be amended by action of the State Legislature. The CPRB issues a publicly available financial report that includes financial statements for PERS that may be obtained at www.wvretirement.com.

Benefits provided

Employees are eligible for normal retirement at age 60 with five or more years of credited service, of at least age 55 with age and service equal to 80 or greater. For all employees hired on or after July 1, 2015, qualification for normal retirement is age 62 with ten years of service or at least age 55 with age and service equal to 80 or greater. The straight-life annuity retirement benefit, established by State statute, is equivalent to two percent of the employee's final average salary multiplied by years of service. Final average salary is the average of the three consecutive highest annual earnings out of the last fifteen years of earnings. For all employees hired on or after July 1, 2015, average salary is the average of the five consecutive highest annual earnings out of the last fifteen years of earnings. Terminated members with at least five years of contributory service who do not withdraw their accumulated contributions may elect to receive their retirement annuity beginning at age 62. For all employees

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

hired on or after July 1, 2015 who have separated from employment with a participating PERS agency prior to retirement, the retirement age increases to age 64.

Contributions

While contribution rates are legislatively determined, actuarial valuations are performed to assist PERS and the State Legislature in determining contribution rates. Current funding policy requires employer contributions of 13.5%, 14.0% and 14.5% for the years ended June 30, 2016, 2015 and 2014, respectively. As permitted by legislation, BRIM has elected to pay 100% of all costs relating to the Plan, including the employee’s 4.5% contribution for employees hired on or before February 6, 2012. Beginning February 7, 2012, new hires are required to pay the employee’s contribution of 4.5%. For all employees hired on or after July 1, 2015 the employee contribution increased to 6.0%. The BRIM’s contributions to the Plan were \$149, \$127, and \$133 for the fiscal years ended June 30, 2016, 2015 and 2014, respectively.

Pension liabilities, pension expense, and deferred outflows of resources and deferred inflows of resources related to pensions

Effective July 1, 2014, the BRIM adopted the provisions of GASB Statement No. 68, *Accounting and Financial Reporting for Pensions* – an amendment of GASB Statement No. 27, and GASB Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date* – an Amendment of GASB Statement No. 68. As summarized below, a cumulative effect adjustment of \$495 has been recorded to decrease net position previously reported at the beginning of fiscal year 2015. BRIM determined that it was not practical to restate the prior year financial statements as the information was not provided by the West Virginia Consolidated Public Retirement Board (WVCPRB), which administers this cost-sharing multiple-employer plan. These statements reclassified some items previously reported as expenses as deferred outflows and now requires BRIM to record the net pension liability and a more comprehensive measure of pension expense.

Net Position at the Beginning of the Year Required Statement:	
Net Position beginning of year, as previously reported	\$ 208,911
Total cumulative effect adjustment	<u>(495)</u>
Net Position at June 30, 2014, restated	<u>\$ 208,416</u>

During fiscal year 2016, BRIM, along with other State of West Virginia agencies participating in PERS adopted GASB Statement 73, *Accounting and Financial Reporting for Pensions and related Assets That Are Not within the Scope of GASB 68, and Amendments to Certain Provisions of GASB Statements 67 and 68, GASB Statement 78, Pensions Provided through Certain Multiple-Employer Defined Benefit Pension Plans, and GASB Statement 82, Pension Issues and Amendment of GASB Statements 67, 68, and 73*. The impact of adopting these statements was not material to the BRIM’s financial statements.

At June 30, 2016 and 2015, the BRIM reported a liability of \$467 and \$254 for its proportionate share of the net pension liability. The net pension liability reported at June 30, 2016 was measured as of June 30, 2015 and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of July 1, 2014, rolled forward to the measurement date of June 30, 2015. BRIM’s proportion of the net pension liability was based on the BRIM’s share of contributions to the pension plan relative to the contributions of all employers participating in PERS for the year ended June 30, 2015. At June 30, 2015, BRIM’s proportionate share was 0.0836%, which was an increase of 0.0596% for its proportionate share measured as of June 30, 2014.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

For the years ended June 30, 2016 and 2015, BRIM recognized pension expense of \$137 and \$28, respectively. At June 30, 2016 and 2015, BRIM reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	<u>2016</u>		<u>2015</u>	
	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Net difference between projected and actual earnings on pension plan investments	\$ 142	\$ 245	\$ -	\$ 269
Differences between expected and actual experience	96	-	-	-
Difference in assumptions	-	56	-	-
Changes in proportion and differences between BRIM's contributions and proportionate share of contributions	-	3	-	1
BRIM's contributions made subsequent to the measurement date of June 30, 2016 and 2015	<u>149</u>	<u>-</u>	<u>127</u>	<u>-</u>
Total	<u>\$ 387</u>	<u>\$ 304</u>	<u>\$ 127</u>	<u>\$ 270</u>

Employer contributions to the PERS made during the fiscal year, subsequent to the pension liability measurement date, are recorded as deferred outflows of resources, and will be recognized as a reduction of the net pension liability in the following year. The net difference between projected and actual investment earnings on pension plan investments is amortized over a five year period. All other deferred outflows of resources and deferred inflows of resources relating to pension amounts reported in the financial statements are amortized and included in pension expense over the average remaining service life, rounded to the nearest whole year, of four years. These other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

Year ending June 30:

2017	\$ (34)
2018	\$ (34)
2019	\$ (33)
2020	\$ 35

Actuarial assumptions and methods

The total pension liability in the June 30, 2015 actuarial valuation was determined using the following actuarial assumptions, applied to all periods in the measurement:

Inflation	1.9%
Salary increase	3.0 – 6.0%, average, including inflation
Investment rate of return	7.5%, net of pension plan investment expense

Mortality rates were based on 110% of the RP-2000 Non-Annuitant, Scale AA for healthy males, 101% of RP-2000 Non-Annuitant Scale for healthy females, 96% of RP-2000 Disabled Annuitant, Scale AA for disabled males, and 107% of RP-2000 Disabled Annuitant, Scale AA for disabled females.

The actuarial assumptions used in the June 30, 2015 valuation were based on the results from an actual experience study for the period July 1, 2009 through June 30, 2014.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

The total pension liability in the June 30, 2014 actuarial valuation was determined using the following actuarial assumptions, applied to all periods in the measurement:

Inflation	2.2%
Salary increase	4.25 – 6.0%, average, including inflation
Investment rate of return	7.5%, net of pension plan investment expense

Mortality rates were based on the 1983 Group Annuity Mortality (GAM) for healthy males, 1971 GAM for healthy females, 1971 GAM for disabled males, and Revenue Ruling 96-7 for disabled females.

The actuarial assumptions used in the June 30, 2014 valuation were based on the results of an actuarial experience study for the period July 1, 2004 through June 30, 2009.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Fixed Income	15.0%	2.9-4.8%
Domestic equity	27.5%	7.6%
International equity	27.5%	8.5%
Real estate	10.0%	6.8%
Private equity	10.0%	9.9%
Hedge funds	<u>10.0%</u>	5.0%
Total	<u><u>100.0%</u></u>	

Discount rate

The discount rate used to measure the total pension liability was 7.5%. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that contributions from employers will continue to be made at statutorily required rates, which are determined by actuarial valuations. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. Although discount rates are subject to change between measurement dates, there were no changes in the discount rate in the current period.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

Sensitivity of BRIM'S proportionate share of the net pension liability to changes in the discount rate

The following presents BRIM's proportionate share of the net pension liability calculated using the discount rate of 7.5%, as well as what BRIM's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (6.5%) or one percentage point higher (8.5%) than the current rate:

	<u>1% Decrease (6.5%)</u>	<u>Current Discount Rate (7.5%)</u>	<u>1% Increase (8.5%)</u>
BRIM's proportionate share of net pension liability	\$ 1,076	\$ 467	(48)

Other postemployment benefits (OPEB)

BRIM participates in a cost-sharing, multiemployer, defined benefit other postemployment benefit plan that covers the retirees of State agencies, colleges and universities, county boards of education, and other government entities as set forth in the West Virginia Code. Financial activities of the OPEB plan are accounted for in the BRIM. The plan provides the following retiree group insurance coverage to participants: medical and prescription drug coverage through a self-insured preferred provider benefit plan and through external managed care organizations, basic group life, accidental death, and prescription drug coverage for retired employees of the State, and various related State and non-State agencies, and their dependents. Details regarding this plan and a copy of the BRIM financial report can be obtained by contacting Public Employees Insurance Agency, 601 57th Street, S.E., Suite 2, Charleston, West Virginia 25304 or by calling (888) 680-7342.

Upon retirement, an employee may apply unused sick leave and/or annual leave to reduce his or her future insurance premiums paid to the BRIM. Substantially all employees hired prior to July 1, 2001, may become eligible for these benefits if they reach normal retirement age while working for BRIM. According to West Virginia State Code, employees hired prior to June 30, 1988, can receive health care credit against 100% of their health care coverage. Employees hired between June 30, 1988 and June 30, 2001, can receive health care credit against 50% of their health care cost. Employees hired July 1, 2001, or later may not convert sick leave into a health care benefit. The conversion of sick leave into OPEB health care benefits is now required to be accounted for as part of the OPEB obligation.

Legislation requires the BRIM to determine, through an actuarial study, the Annual Required Contribution (ARC), which shall be sufficient to maintain the BRIM in an actuarially sound manner. The ARC is allocated to respective cost-sharing employers, including BRIM, who are required by law to fund at least the minimum annual premium component of the ARC. Revenues collected by BRIM shall be used to fund current OPEB health care claims and administrative expenses with residual funds held in trust for future OPEB costs. BRIM records expense for its allocated ARC and a liability for the ARC that has not been paid. Approximately \$471 and \$407 of the ARC remained unpaid as of June 30, 2016 and 2015, respectively, and is recorded in accrued expenses and other liabilities on the statements of net position. For fiscal years 2016, 2015 and 2014, BRIM's OPEB contribution was approximately \$44, \$40 and \$54, respectively, of the total required contribution of \$44, \$40 and \$63, respectively. The actual contribution represents 49%, 74% and 85% of the ARC for 2016, 2015 and 2014, respectively. BRIM's policy is to fund at least the minimum annual premium component of the ARC. There are currently 22 employees eligible to receive such benefits.

The GASB has issued Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*, effective for fiscal years beginning after June 15, 2017. The requirements of this Statement will improve accounting and financial reporting by state and local governments for postemployment benefits other than pensions (other postemployment benefits or OPEB). It also improves information provided by state and local governmental employers about financial support for OPEB that is provided by other entities. Management has not yet determined the effect that the adoption of GASB Statement No. 75 may have on its financial statements.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements

6. Lease Arrangement

In December 2011, the State renewed the lease arrangement on behalf of BRIM for office space occupied by BRIM with a monthly lease payment of \$15 and a term beginning on January 1, 2012, and ending on December 31, 2016. On October 1, 2016, BRIM entered into a lease with the West Virginia Department of Administration for 13,364 square feet at the Albert Summers building located at 1124 Smith Street, Charleston, WV for an annual rental of \$222. This lease expires on August 31, 2019.

Operating lease expense approximated \$139 for the years ended June 30, 2016 and 2015, relating to these arrangements. Future minimum lease payments under these operating lease arrangements are as follows for years ending June 30:

2017	\$	236
2018	\$	222
2019	\$	222
2020	\$	37

7. Transactions With Primary Government and Component Units

Premium revenues derived from billings to State entities, which are funded by special revenue funds and component units of the primary government, approximated \$37,688 and \$32,119 for the years ended June 30, 2016 and 2015, respectively.

BRIM is required by Senate Bill 1002 to remit amounts equal to the gross premium tax attributable to premiums collected by BRIM. These amounts are to be placed in a separate account known as "the Premium Tax Savings Fund" (the Fund) maintained by the State Treasurer. Amounts deposited by BRIM into the Fund approximated \$2,196 and \$2,198 for the years ended June 30, 2016 and 2015, respectively. The Fund is not included in BRIM's financial statements, but is included in the general fund of the State.

8. Reinsurance (*Amounts referenced in this note related to insurance coverages are actual dollars*)

BRIM has entered into two reinsurance agreements for excess coverage with unrelated insurance companies wherein the company assumes the liability over BRIM's limit for a ceded premium. BRIM obtains an excess policy from the commercial market, which gives boards of education a liability limit of up to \$5 million in excess of BRIM's \$1 million self-insured limit BRIM also purchases an excess policy on all State and SB3 insured property over and above BRIM's \$1 million self-insured limit These reinsurance agreements have been accounted for as a transfer of risk in the accompanying financial statements. However, BRIM is not relieved of its primary obligation to the insureds in the reinsurance transaction. BRIM had \$229 reinsurance recoveries for the fiscal year ended June 30, 2016, and \$1,200 for the fiscal year ended June 30, 2015.

West Virginia Board of Risk and Insurance Management
Notes to Financial Statements
(in thousands)

9. Risk Management (*Amounts referenced in this note related to insurance coverages are actual dollars*)

BRIM is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to and illnesses of employees; medical liabilities; and natural disasters.

BRIM is a participant in the self-insured public entity risk pool it administers. Coverage is in the amount of \$1 million per occurrence for general liability and property damage. Health insurance coverage for BRIM's employees is obtained through its participation in health insurance coverage offered by the West Virginia Public Employees Insurance Agency (PEIA). PEIA provides the following basic employee benefit coverage to all participants: hospital, surgical, group major medical, basic group life, accidental death, and prescription drug coverage for active and retired employees of the State and various related State and non-State agencies. BRIM has coverage for job-related injuries through a statewide workers' compensation policy with a third-party insurer.

There have been no significant reductions in insurance coverage from the prior year. Additionally, the amount of settlements has not exceeded insurance coverage in the past three years.

Required Supplementary Information

West Virginia Board of Risk and Insurance Management
Ten-Year Claims Development Information
Fiscal and Policy Year Ended June 30
(in thousands)

The table below illustrates how BRIM's earned revenues (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by BRIM as of the end of each of the last ten years. The rows of the table are defined as follows: (1) This line shows the total of each fiscal year's premium revenues and investment revenues. (2) This line shows each fiscal year's other operating costs of BRIM including overhead and unallocated claims expense not allocable to individual claims. (3) This line shows BRIM's incurred claims and claims adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year). (4) This section of rows shows the cumulative amounts paid as of the end of successive years for each policy year. (5) This line shows the latest reestimated amount of losses assumed by reinsurers for each year. (6) This section of rows shows how each policy year's incurred claims increased or decreased as of the end of successive years. This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known. (7) This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years. The columns of the table show data for successive policy years.

Notes to Required Supplementary Information – Schedule of Proportionate Share of the Net Pension Liability in PERS and Schedule of Contributions to PERS

1. Trend Information Presented

The accompanying schedules of BRIM's proportionate share of the net pension liability and contributions to PERS are required supplementary information to be presented for 10 years. However, until a full 10-year trend is compiled, information is presented in the schedules for those years for which information is available.

2. Plan Amendment

The PERS was amended to make changes that apply to new employees hired on or after July 1, 2015 as follows:

- For employees hired prior to July 1, 2015, qualification for normal retirement is age 60 with five years of service or at least age 55 with age and service equal to 80 or greater. For employees hired on or after July 1, 2015, qualification for normal retirement is 62 with 10 years of service or at least age 55 with age and service equal to 80 or greater.
- The straight life annuity retirement benefit is equivalent to 2% of average salary multiplied by years of service. For employees hired prior to July 1, 2015, average salary is the average of the three consecutive highest annual earnings out of the last fifteen years of earnings. For all employees hired on or after July 1, 2015 average salary is the average of the five consecutive highest annual earnings out of the last fifteen years of earnings.
- For employees hired prior to July 1, 2015, terminated members with at least five years of contributory service who do not withdraw their accumulated contributions may elect to receive their retirement annuity beginning at age 62. For all employees hired on or after July 1, 2015, this age increases to 64.
- For all employees hired prior to July 1, 2015, employees are required to contribute 4.5% of annual earnings. All employees hired on or after July 1, 2015, are required to contribute 6% of annual earnings.

3. Changes in Assumptions

An experience study, which was based on the years 2009 through 2014, was completed prior to the 2015 actuarial valuation. As a result, several assumptions were changed for the actuarial valuation for the year ending June 30, 2015 as follows:

	<u>2015</u>	<u>2014</u>
Projected salary increases:		
State	3.0 - 4.6%	4.25 - 6.0%
Non-state	3.35 - 6.0%	4.25 - 6.0%
Inflation rate	1.90%	2.20%
Mortality rates	Healthy males - 110% of RP- 2000 Non-Annuitant, Scale AA Healthy females - 101% of RP 2000 Non-Annuitant, Scale AA Disabled males - 96% of RP-2000 Disabled annuitant, Scale AA Disables females - 107% of RP-2000 Disabled annuitant, Scale AA	Healthy males - 1983 GAM Healthy females - 1971 GAM Disabled males - 1971 GAM Disabled females - Revenue ruling 96-7
Withdrawal rates:		
State	1.75 - 35.1%	1 - 26%
Non-state	2 - 35.8%	2 - 31.2%
Disability rates	0 - .675%	0 - .8%

Report of Independent Auditors on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of the Financial Statements Performed in Accordance With *Government Auditing Standards*

Board of Directors and Management
West Virginia Board of Risk and Insurance Management
Charleston, West Virginia

We have audited, in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the West Virginia Board of Risk and Insurance Management (BRIM), which comprise the statement of net position as of June 30, 2016, and the related statements of revenues, expenses and changes in position, and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated December 19, 2016.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered BRIM's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of BRIM's internal control. Accordingly, we do not express an opinion on the effectiveness of BRIM's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether BRIM's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
